

IntelliXcap Automated Septum Cap Decapper/Recapper 96-format

The IntelliXcap™ Automated Septum Cap Decapper/Recapper is ideal for use in high-throughput workflows that require capping and decapping of septum capped tubes. The instrument provides secure sealing – eliminating the need for manual intervention, while preserving vital sample integrity.

This high-speed whole rack tube decapper and capper automatically removes, recaps, or disposes of septum caps from a full 96-format SBS rack of sample storage tubes as well as allowing for the capping of Azena tubes from a cap mat. The system is ideal for use within high-throughput environments such as in biobanking, compound libraries, and other storage applications.

Compatible with multiple sample storage tube types from a range of tube manufacturers, the system provides flexibility in either fully automated robotic systems or as a standalone unit.

Key Features

ADVANCED AUTOMATION FOR INCREASED THROUGHPUT

- Suitable for use with 96-format tubes from Azena as well as those from other manufacturers
- Automation and speed reduces sample handling time, increasing sample throughput workflow
- Ideal for medium to high-throughput laboratories managing compound libraries, biobanks, or other biological samples

COMPACT, MODULAR DESIGN FOR ULTIMATE FLEXIBILITY

- No requirement for compressed air for flexible use within the lab
- Capping module available for Azena labware, enabling capping of tubes from cap mat
- Single column harpoon decapping and recapping available as add-on

EASY TO USE, EASY TO INTEGRATE

- Quick installation and easy-to-use touch panels bring instant control
- Wide operating temperature range of 15°C to 35°C
- Control is via a quick installation, easy-to-use touch panel
