About us

LMS has been producing scientific incubation products since 1979. Now renowned for their quality and longevity, our cooled incubators are used all over the world for a range of bio-scientific needs - from tissue and fruit fly cultures, to enzyme testing and seed storage. All equipment is manufactured in our own UK factory, which gives us the flexibility to accommodate a range of specification requirements.

Our wide range of LMS models are available in various sizes, materials and capabilities, with each one giving you accurate and reliable temperature control for incubation. Our bespoke service allows you to tailor every product to your specific needs, offering unrivalled flexibility to suit the requirements of any laboratory.

B.O.D. tests

Enzyme testing

Serum studies

Growth pattern studies

Seed germination and vernalisation

Reliable and accurate temperature control

Our cooled incubators offer optimum temperature control from -10°C to +50°C with an average variation of $\pm 0.5^\circ\text{C}$ and fluctuation of 0.1°C.

As standard:

Flexible temperature control parameters

Parameters set to your specification if needed

Door lock

Preventing unauthorised access

Fan assisted air circulation

Keeping temperatures consistent

Choice of interiors and exteriors

Plastic for ease of clean, Aluminium or white coated to reflect light

Hermetically sealed refrigeration system

Air-tight to avoid controlled temperature loss

Wire shelves

For optimum airflow

Defrost

Automatic, with a manual override option built in

Self-evaporating condensate drip-tray

Eliminating the pooling of moisture

RJ 45 interface for remote access (wired)

User friendly control enables performance visibility and parameter changes

Full P.I.D. heating/cooling control

Optimising power usage when needed

Pre-set 70°C safety cutout

Safeguarding from over heating

Electronics RF and TV suppressed

Voltage surge protection

Built to your requirements

Your optional extras:

Programmable controller

Allows control over temperature and lighting

Dual temperature control

For day - night environments

Double glazed door

For visibility whilst avoiding door open events*
*Selected models only, glass door temperature range 0°C to 40°C

Inner perspex door

Reduces temperature loss whilst viewing contents

Extra shelves

For increased storage

Fully programmable interior illumination

To simulate your required environment

Independent 24 hour / 7 day timer

For complete control

High / Low A/V alarm

Warning alarms to safeguard your contents

Fruit fly modification

Prevents corrosion caused by fruit fly

Access porthole

For additional temperature probes

Integral chart recorder

For recording data

Internal 13A socket (EU/UK)

Flexible power options

Drying mode

Reducing moisture

Corrosive conditions evaporator

Preventing deterioration

Pre-programming service

Temperature and lighting pre-programmed to your specification

COOLED INCUBATION

Unit 4-8 Beeding Close,
Southern Cross Trading Estate,
Bognor Regis, Sussex, PO22 9TS.
