

Cleaning & Disinfection Solutions

Reagecon's Cleaning and Disinfection Solutions are developed and designed to provide optimum cleaning and sanitisation in laboratories and processing plants. These ready-to-use products eliminate the need for diluting solutions in-house (together with the associated risks of handling strong oxidizers) and save time, resources and cost in their purchase, production and storage.

Sodium Hypochlorite Solutions

- Various concentrations that delivery from 0.3% - 7% available chlorine.
- Recommended for general disinfection of laboratory equipment and apparatus, including benches, sinks, floors and contact surfaces (not stainless steel)
- Sanitisation of production areas and processing equipment
- As effective as Chlorine Gas

IPA and Ethanol Solutions

- Products contain from 30 - 70% IPA or 70% Ethanol
- High quality antimicrobial (bactericidal/viricidal) disinfectant
- Highly effective in cleaning and sanitisation of laboratory, production and processing areas and equipment (not stainless steel).

●●●● Highly Effective
 ●●●◇ Moderately Effective
 ◇◇◇◇ Ineffective

PROPERTIES OF REAGECON'S SANITISERS AND DISINFECTANTS

	Optimum pH range for Sanitisation	Germicidal Activity	Activity against Gram Positive Bacteria	Activity against Gram Negative Bacteria	Activity against Spores	Viricidal
