1) 20 and 50 ml dosing unit usable (no intelligent interchangeable units)

2) Can be used as titration and dosing burette in automatic titration systems

New from SI Analytics:

TITRONIC® 300 and TitroLine® 5000

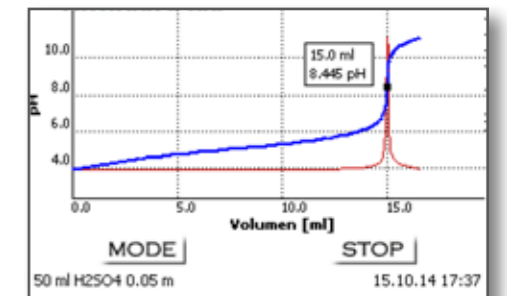

The new Titration instruments

The new piston burette TITRONIC® 300 and the automatic Titrator TitroLine® 5000 from SI Analytics, as successor of the very successful burette TITRONIC® *universal* and the titrator TitroLine® *easy*, convince with the well known easy handling and innovative features.

titrator

Standard methods:

Default method	
Alkalinity (p+m)	
Chloride in %	
Chloride in mg/l	
COD Blank	
COD Sample	
COD Titer	
Dosing method	dos ▼
▲ V	OK
50 ml NaOH 0.1 m	ESC
	10/20/14 11:54

- ▲ Visibility: Full color display, including online curves that can be easily viewed from a distance and at extreme angles
- ▲ Includes two USB and two RS232 ports for expansion and connection of devices such as USB keyboard, USB-storage device, balance, PC and additional SI Analytics peripherals
- ▲ Exports the results as PDF and CSV to a memory stick/USB device
- ▲ Transfer of methods via USB device
- ▲ Standard methods
- ▲ Daisy-chain capability

Advantages
TitroLine® 5000
TITRONIC® 300

TITRONIC® 300 - the new piston burette from SI Analytics

Titration manually, perfectly dosing

The TITRONIC® 300 is a perfect motor-driven burette for manual titration and precise dosing instrument for dispensable liquids, solvents and titrating agents. However, the TITRONIC® 300 is not only first-rate as a stand-alone instrument, it also thrives as the heart of a computer-controlled dosing or titrating system.

Manual Titration

It is true that the automatic titration is gaining ground, but manual titration remains one of the standard cost effective applications in the lab, wherever high precision and flexibility are required.

- ▶ Titration with hand controller (mouse).
- ▶ Titration rate can be adjusted in five different steps to optimize the titration speed and accuracy.
- ▶ Automatic calculation of results in different units and exportation to a printer or USB memory device.
- ▶ Automatic weight recording when a balance is connected.

Dosing

Beside the titration there are various routine dosing tasks that must be performed in the lab. A piston burette is the ideal device for precise dosing tasks:

- ▶ Adjustable dosing and filling rate for each method.
- ▶ Adjustable filling between each dose step.
- ▶ The intelligent filling function checks if a dosing step is feasible without filling in advance. This reduces faulty operations during a serial dosing process.

TitroLine® 5000 - the new automatic Titrator from SI Analytics

The predecessor of the TitroLine® 5000, TitroLine® easy, has always been the first choice if you were looking for a very easy-to-use automatic titrator for any application. A special training or a deeper knowledge of automatic titration was not necessary to get precise and quick results. That and much more is exactly what the new TitroLine® 5000 stands for:

- ▶ High resolution pH/mV-measurement input for pH-, ORP-, silver - and further mV-electrodes
- ▶ Pt 1000 and NTC 30 temperature measurement input for automatic temperature compensation
- ▶ Pre-installed standard methods for FOS/TAC, alkalinity, total acidity in drinks, chloride etc.
- ▶ Linear and dynamic titration to equivalence points
- ▶ Titration to pH and mV-end points
- ▶ Same manual titration and dosing function as the piston burette TITRONIC® 300

The easiest titration ever...

Typical applications of water/wastewater and environmental analysis

- ▶ pH-value, alkalinity (p+m-value)
- ▶ FOS/TAC (see titration curve and result screen as example)
- ▶ Total Kjeldahl nitrogen
- ▶ Permanganat index and COD
- ▶ Chloride in wastewater

Typical applications of food analysis

- ▶ Salt content (chloride, sodium chloride, see titration curve as example)
- ▶ pH-value, total acidity in wine, drinks and other food products
- ▶ Ascorbic acid
- ▶ Protein determination (Kjeldahl-nitrogen in milk and dairy products)
- ▶ Iodine and peroxide value

Specifications - TITRONIC® 300

Features	
Interfaces:	1 x USB-A and 1 x USB-B, 2 x RS-232-C
Stirrer connection:	TM 50, power supply directly through piston burette
Keyboard:	The unit is operated using the keys on the device itself, the controller TZ 3880 and optional PC-keyboard (USB)
Display:	graphics-capable TFT display.
Volume display:	0000,000...9999,999 ml
Display resolution:	0.005-0.025 ml (depending on dosing unit)
Dosing speed:	max. 100 ml/min (with 50 ml unit)
Filling speed	min 30 s to 999 s adjustable (time according to the cylinder volume)
Dosing units:	20 ml or 50 ml dosing unit, interchangeable
Burette resolution:	8000
Dosing accuracy:	systematic error 0.15 %, random error 0.05 % in compliance with EN ISO 8655-6
Power supply:	100 -240 V~; 50/60 Hz, power input 30 VA
Conformity:	ISO 8655, part 6
CE-mark:	EMC: 2004/108/EG; safety EG- Directive 2006/95
Dimensions	135 x 310 x 205 mm (W x H x D), including dosing unit, without stirrer
Weight:	2 kg (without stirrer)
Ambient conditions	Ambient temperature: + 10 ... + 40 °C for operation and storage. Humidity according to EN 61 010, Part 1: Max. relative humidity 80 % for temperatures up to 31 °C, linear decrease down to 50 % relative humidity at a temperature of 40 °

What can Xylem do for you?

We're 12,700 people unified in a common purpose: creating innovative solutions to meet our world's water needs. Developing new technologies that will improve the way water is used, conserved, and re-used in the future is central to our work. We move, treat, analyze, and return water to the environment, and we help people use water efficiently, in their homes, buildings, factories and farms. In more than 150 countries, we have strong, long-standing relationships with customers who know us for our powerful combination of leading product brands and applications expertise, backed by a legacy of innovation.
