

New & Improved 3M™ Clean-Trace™ Water - Total ATP Test

The new and improved 3M™ Clean-Trace™ Water – Total ATP test now has an innovative formulation providing improved temperature stability and test result accuracy.

Now known as 3M™ Clean-Trace™ Water Plus – Total ATP (AQT200), the test is designed to rapidly assess equipment sanitation processes and the efficiency of Clean In Place (CIP) procedures by the improved more accurate detection of organic contamination from microbial or product residues.

The test gives an objective indication of cleanliness in water samples in seconds. Designed for use with the 3M™ Clean-Trace™ NG Luminometer, the new AQT200 formulation now provides the ability to gain more consistent and reliable results providing greater confidence in your hygiene monitoring procedures.

The new and improved formulation also provides the flexibility to store AQT200 at your own convenience - room temperature for up to 2 months or refrigerated for up to 12 months.

The new formulation, room temperature stability and ease of use makes 3M Clean-Trace Water Plus – Total ATP the water test of choice.

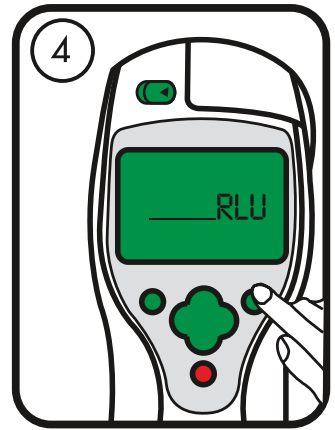

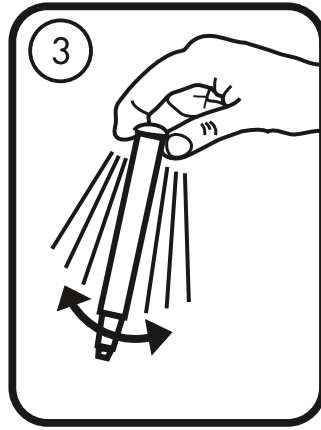

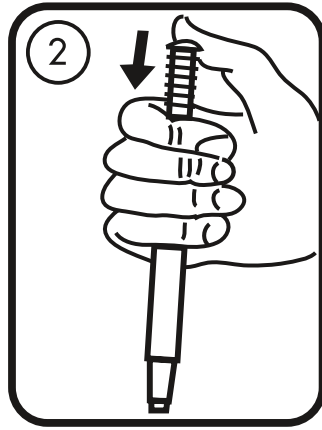

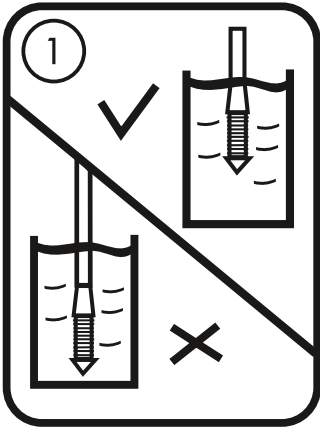

Key Features:

- Flexible storage options
 - 12 months shelf life refrigerated (2°C – 8°C)
 - 2 months shelf life at room temperature (21°C - 25°C)
- Rapid results allowing for corrective action to be taken immediately
- Simple to use – Ideal for busy production environments
- Ability to track and trend results using 3M™ Clean-Trace™ Data Trending Software

Trusted results,
consistently and quickly

How it works

4 simple steps

Ordering Information:

3M™ Clean-Trace™ Water Plus – Total ATP

Product #	Description
AQT200	100 / Case

3M™ Clean-Trace™ NG Luminometer*

Product #	Description
NG3	1 / Each

*The 3M Clean-Trace NG Luminometer includes the 3M™ Clean-Trace™ Data Trending Software. Computer not included.
