

## PRODUCT DESCRIPTION

Easy to use as a standard timer or automatically triggered by external devices for start/stop via 4mm jack sockets. The stop-clock is a high accuracy timer, with a robust construction ideal for regular use. Colour coded buttons and jack sockets make the timer extremely practical and convenient to use.

- 30ppm quartz crystal with a fixed calibrated capacitor of 27pF for hi-accuracy timing
- 15mm LCD display
- Quick and easy press-button action for activation of start, stop and reset
- Stop, start and reset actuation buttons located on the top of the timer for faster reaction times
- Pressing the reset button during a timing cycle displays the time elapsed
- 4mm jack sockets for start, stop and reset allow automatic triggering of timer by external devices
- Practical and convenient to use with colour coding and clear marking on buttons and jack sockets
- Impact-resistant ABS case with non-slip rubber feet for stability on the bench
- Supplied with battery

### TECHNICAL SPECIFICATIONS

<b>Capacity</b>	99 mins, 59.99secs with auto roll-over
<b>Resolution</b>	0.01 seconds
<b>Accuracy</b>	±1 second in 24 hours
<b>Power</b>	1 x 1.5V AAA alkaline battery (LR-3)
<b>Dimensions</b>	100 x 105 x 80mm
<b>Weights</b>	151g
